

MCRD PARRIS ISLAND ENVIRONMENTAL NEWSLETTER

Issue: April 2023

“Protect the Environment, Sustain the Mission”

Celebrating the 50th Anniversary of the Endangered Species Act! Signed in 1973, the landmark piece of legislation institutionalized our national commitment to conservation and the protection of imperiled fish, plants, wildlife, and the places they call home. The Act remains a long-lasting example of commitment, cooperation, and conservation triumphs we can make when working together (esa50.org).

The Wood Stork is a federally listed threatened species that utilizes the wetland habitats on MCRD Parris Island (Photo Credit: sc.audobon.org)
