(g) UFC 3-580-01

Encl: (1) Telephone Service Request Form
(2) Bulk Move Spreadsheet
(3) Telephone Bomb Threat Checklist
(4) DSN Directory

1. Situation. To provide information and policy regarding the installation, management, funding and discontinuance of telephone services and associated devices onboard Marine Corps Recruit Depot Parris Island (MCRDPI)/Eastern Recruiting Region (ERR).

2. Cancellation. Depot Order 2060.1E.

3. Mission. Per references (a) through (g), the G-6 Telecommunications Branch is responsible for the technical management of the Depot Communications infrastructure and services. This Order specifically addresses responsibilities regarding customer stewardship of assets associated with the base telephone system, and for the installation, operation and maintenance of the MCRDPI/ERR Depot Telephone Switched Network (DTSN).

4. Execution

a. Commander's Intent and Concept of Operations

(1) Commander's Intent. The DTSN is a United States (U.S.) Government-owned, maintained and operated telephone system. This Order applies to all U.S. Government, military and inter-service subscribers receiving telephony services from the G-6 Telecommunications Branch. The DTSN also provides unofficial

Distribution A: Approved for public; distribution unlimited.

(reimbursable) services. The following paragraphs provide general information, definitions and procedures.

(2) Summary of Revision

(a) This Order has been revised and rewritten and should be reviewed in its entirety.

(b) Major changes include removal of telephone control officer requirements, telephone logs, updates to personal calls and enclosures.

(3) Subordinate Element Missions. Commanding Officers and Tenant Activities shall:

(a) Ensure DSN is the first choice for all long distance calls placed from the workspace. Commercial calls and cellular phones should be used only if a DSN call cannot be placed. To access DSN, dial 94 followed by the DSN prefix and the last four digits of the number. The following is an example of a DSN dialing sequence: To dial the commercial number "229-639-5000" at MCLB Albany, GA the user would dial DSN "94 567-5000." If the phone does not have DSN direct dial capability, DSN can be accessed by dialing the MCRD PI switchboard operator at 2608. DSN prefix codes are contained in enclosure (4).

(b) Periodically validate the requirements for long distance DSN capability on all telephones within your areas of responsibility with direct dial capability.

(c) Ensure all personnel are aware of restrictions placed on the use of DSN.

(d) Ensure only essential DSN calls of an official nature originate from your workspace.

(e) Ensure that only the minimum number of telephones required to perform the organization's mission are installed.

(4) Concept of Operations

(a) Telephony. G-6 Telecommunications Branch provides several discreet services that comprise telephony services to include:

1. On-base landline telephone and service
2. Off-base Defense Switched Network (DSN) access
3. Off-base commercial access
4. Cellular and mobile services

FEB 4 2021

5. Voice-mail
6. Automatic Call Distribution (ACD)
7. Customer billing (reimbursable customers).

(b) Official Customers. Official customers are divided into two general groups: Class A and Class B.

1. Class A- Mission Customers. Within the limitations established by baseline quantities, Class A mission customers will receive base telephone and cellular services, to include dial-tone, moves, adds and changes (MAC) and toll services without the need for local payment or reimbursement. In the event that a Class A mission customer requests support for a project or other expense that exceeds the baseline amounts, the customer will be required to fund the project via an approved means of payment.

2. Class B- Reimbursable Customers. Reimbursable customers are defined as those who pay for services with non-government appropriated funds (NAF) or private funds. Examples would include, Red Cross, Marine Corps Community Services (MCCS) and commercial concerns authorized to conduct business from a fixed location on the Depot. The authority for "commercial concerns" must be identified in a contract or permit issued by the Commanding General (CG), MCRDPI/ERR.

(c) Defense Switched Network (DSN). DSN is the global Department of Defense (DoD) telephone network that connects all military units, using a common dialing plan with regional prefixes. While the DTSN forms a part of the DSN, out-dial access to the DSN from any Depot line is controlled at the Base telephone switch.

1. Due to limited DSN and commercial trunking, it is necessary to carefully manage access to the DSN telephone service at MCRDPI/ERR. Granting access to more users than available trunks can support may result in blocked calls.

2. All Depot and tenant organizations should limit the number of telephones with DSN Class A service to those that are deemed mission-essential. The G-6 Telecommunications Branch will conduct periodic reviews of DSN Class A access to ensure the optimum level of service is provided.

(d) Public Switched Telephone Network (PSTN). The commercial numbering plan used by base telephone customers is established by the telephone services provider and is not controlled by the G-6 Telecommunications Branch. As with DSN access, out-dial access into the PSTN is controlled by "class of service" assignment at the base telephone switch.

24 FEB 2023

(e) Subscriber Activities. Any unit, organization, agency, department or office receiving telephone service from MCRDPI/ERR is considered a subscriber activity. Included are Headquarters & Services Battalion, Recruit Training Regiment (RTR), Weapons & Field Training Battalion, MCCS, 6th Marine Corps District, Naval Hospital and other tenant activities. Subscriber activities are responsible for the following:

1. Safeguarding and restricting the use of telephone equipment and services to official business only.

2. Informing the G-6 Telecommunications Officer of any planned changes that impact telecommunications support.

3. Ensuring that all temporary and long-term telephone lines and circuits established on the installation are approved by the G-6 Telecommunications Branch prior to installation.

(f) Telephone Billing Certification and Verification. Certification is the process of comparing the unit's itemized phone bill to the unit's logs and is conducted by G-6 personnel.

1. Questions regarding itemized bills or certification procedures should be referred to the G-6 Telephone Billing and Accounts office, 843-228-2816.

2. Telephone billing certifications are due at the Telephone Billing and Accounts office every month, within five working days of receipt. Notification of failure to comply with certification procedures will be forwarded to the unit commander via the appropriate chain of command.

(g) Telephone Fraud. Telephone fraud is any use of an official telephone for unofficial purposes that causes a charge to the U.S. Government.

1. All fraudulent and unauthorized long-distance telephone calls will be promptly and properly investigated by the G-6 Telecommunications Officer.

2. The G-6 Telecommunications Branch will monitor phone bills and activity in an attempt to identify fraudulent telephone calls. If misuse or abuse is suspected, the G-6 Telecommunications Branch will notify the unit commander.

3. All unofficial calls will be paid for by the caller. Payment of the toll charges does not absolve the caller from any disciplinary action that the command may impose.

(h) Personal use of Government Phones. A modest amount of personal use of Government landline and cellular telephones is allowed if certain criteria are met:

1. The calls do not adversely affect performance of the employee's official duties or the mission of the employee's organization.

2. The calls are of reasonable duration and frequency.

3. Personal calls must not result in a charge to the U.S. Government even if the employee intends to reimburse the U.S. Government.

(i) International Calls. G-6 Telecommunications Branch is responsible for providing connectivity to the DSN official long-distance capability. DSN will be the first choice for placement of international phone calls.

1. Overseas DSN calls can be placed from telephone numbers with DSN access directly or through the Depot Telephone Operator without prior approval.

2. DSN may be used to place health, morale and welfare calls from or to outside the contiguous United States (CONUS) isolated or remote geographic locations because of no availability of acceptable commercial services.

3. Official international commercial calls are to be paid for by the using unit. These calls will be connected via the Depot Telephone Operator.

(j) Private Party charges and reimbursements for Class B Telephone Services

1. In accordance with references (f) and (g), all current private parties, i.e., unofficial telephone subscribers, receiving phone services on board a military installation are required to pay estimated charges in advance.

2. Accounts are updated monthly and account status reports are available. The report contains the current month charges and the amount of funds used against the advance. Utilities rental and phone rates are determined and published by the Utilities and Rental Housing Board. This rate schedule is available upon request.

3. All contractors, concessionaires or vendors requiring new telephone service are required to obtain telephone service through the local exchange carrier.

24 FEB 2000

(k) Monitoring Conversations. Unless authorized by statute, regulation or other lawful authority, the use of electronic and mechanical recording devices to intercept telephone conversations are forbidden and will not be connected to telecommunications equipment or facilities that are part of the DTSN.

(l) Requests for Telephone Service

1. Move/Add/Change (MAC) service requests will be submitted using a telephone service request (TSR), enclosure (1), which can be emailed to mcrdpi G-6 telephone@usmc.mil. TSRs will be reviewed for approval by the G-6 Telecommunications Officer or designee. Bulk Move requests, enclosure (2), should also be forwarded to G-6 Operations in order to make sure the requirements can be met and for tracking purposes.

2. Points of contact listed on the TSR will be notified on all disapproved or changed TSRs.

3. In accordance with reference (h), any internal telecommunications or data infrastructure cabling installed by private contractor must have prior written approval by the G-6 Telecommunications Officer.

(m) Requests for Telephone Call Records. Due to the sensitive nature of telephone call records, "Detailed Call Records" will only be provided to official and unofficial customers for the purpose of billing and validation of accounts or for the purpose of official investigations.

(n) Maintenance and Preservation of Telephone Equipment. DTSN is maintained and operated by the G-6 Telecommunications Branch. All equipment and devices connected to the DTSN are the property of the CG, MCRDPI/ERR, to include unit-funded purchases of equipment and devices. Only authorized personnel of the G-6 Telecommunications Branch will service, install, move, remove or interfere with any component or facility of the DTSN.

1. Only G-6 Telecommunications Branch provided and approved telephone instruments and/or equipment will be connected or attached to any portion of the DTSN.

2. Report telephone trouble to the G-6 Helpdesk at 843-228-2004, Option 2.

(o) Conservation of Telephone Service. Requests for service, relocations, extensions or other services should be based on mission essential requirements. Movement or realignment of existing services, which is not directed by a higher authority, will be funded by the requesting command.

5. Administration and Logistics

a. DSN is not authorized for:

(1) Use directly or indirectly by a NAF activity receiving telephone service on the Depot, except when supporting the management and operations of the MCCS activity.

(2) Forwarding to off-net extensions on the Public Switched Telephone Network (PSTN) by a distant DSN exchange except where such extension has been previously approved.

(3) Secure communications; users must remember to avoid divulging or alluding to classified or sensitive information.

b. Complaints. Complaints regarding telephone service, the function of DTSN or specific policies concerning the same should be referred to the G-6 Telecommunications Officer at 843-228-3811 or to the G-6 Operations Officer at 843-228-1006. Customers may also submit an interactive customer evaluation at <https://ice.disa.mil/>.

6. Command and Signal

a. Command. This Order is applicable to MCRDPI/ERR and all tenant commands.

b. Signal. This Order is effective the date signed.
