DEPOT ORDER 5530.3 w/ch 1

From: Commanding General
To: Distribution List

Subj: RESTRICTED AREA DESIGNATION/AREAS IN WHICH DEADLY FORCE
IS AUTHORIZED FOR MARINE CORPS RECRUIT DEPOT/EASTERN
RECRUITING REGION, PARRIS ISLAND (MCRD/ERR, PI)

Ref: (a) MCO 5530.14A
(b) MCO 5500.6G

Encl: (1) Annual Restricted Area List

1. Situation. Per the references, the following areas have been identified as restricted areas and annotated if deadly force is authorized, see enclosure (1).

2. Mission. There are three types of designation for restricted areas: Level One, Level Two, and Level Three. This designation is an annual requirement as per the reference.

3. Execution

a. Level One. The least secure type of restricted areas. It contains a security interest that if lost, stolen, compromised, or sabotaged would cause damage to the command mission and national security. It may serve as a buffer zone for Level Three and Level Two restricted areas, providing access and administrative control, safety, and protection against sabotage, disruption, or potentially threatening acts. Uncontrolled movement may or may not permit access to a security interest or asset.

b. Level Two. The second most secure type of restricted area. It may be inside a Level One area, but never inside a Level Three area. Level Two restricted areas contain a security interest that if lost, stolen, compromised, or sabotaged would cause serious damage to the command mission and national security. Uncontrolled or unescorted movement could permit access to the security interest or asset.

10 SEP 2012

c. Level Three. The most secure type of restricted area. It may be within less secure types of restricted areas. Level Three restricted areas contain a security interest that if lost, stolen, compromised or sabotaged would cause grave damage to the command mission and national security. Access to the Level Three restricted area constitutes, or is considered to constitute, actual access to the security interest or asset.

d. Minimum Security Measures Required for Restricted Areas

(1) Level One. The following minimum-security measures are required for Level One restricted areas:

(a) A clearly defined perimeter. The perimeter may be a fence, the exterior walls of a building or structure, or the outside walls of a space within a building or structure. If the perimeter is a fence or an exterior wall it must be posted with restricted area signs. Points of ingress will be posted.

(b) A personal identification and access control system is suggested. An access control log identifying personnel, date, and entry and departure times may be used, at the discretion of the commanding officer.

(c) Secured during non-working hours.

(d) When secured and not adequately equipped with an operational intrusion detection system (point and area sensors), duty personnel will conduct a check of the facility/area once per 12-hour shift for signs of attempted or successful unauthorized entry, and for other activities that could compromise the security of the restricted area. Security checks are not required for areas adequately equipped with operational IDS.

(2) Level Two. The following minimum-security measures are required for Level Two restricted areas:

(a) A clearly defined and protected perimeter. The perimeter will be a fence or the exterior walls of a building or structure. If the defined and protected perimeter is the outside walls of a space within a building or structure, it must be inside a Level One restricted area. If the perimeter is a fence or wall, it must be posted with restricted area signs. Points of ingress will be posted.

(b) Access limited to personnel authorized in writing by the commanding officer and whose duties require

1 0 SEP 2012

entry. Controlled access of individuals (military, civil service, contractors, and visitors) conducting official business, and/or rendering a service (vendors, delivery people) is required. All visitors must be authorized by the commanding officer and will be escorted by an authorized/cleared individual at all times. The security interest will be protected from compromise.

(c) Use of a personal identification and access control system (an Automated Access Control System (AACS) capable of recording ingress and egress may be used). If a computer log/access control system is used, it must be safeguarded against tampering. During working hours, use of an access list and entry/departure log is required to include all visitors.

(d) Secured during non-working hours.

(e) When secured, checked once per 12-hour shift if adequately equipped with an operational Intrusion Detection System (IDS) point and area sensors, or twice per 12-hour shift for facilities without an operational IDS. Security force personnel will check for signs of attempted or successful unauthorized entry, and for activity that could compromise the security of the restricted area.

(3) Level Three. The following minimum-security measures are required for Level Three restricted areas:

(a) A clearly defined and protected perimeter. The perimeter will be a fence or the outside walls of a space within a building or structure. If the defined and protected perimeter is the outside walls of a space within a building or structure, it must be inside a Level One or Two restricted area. If the perimeter is a fence or wall, it must be posted with restricted area signs. Points of ingress will be posted.

(b) Ingress and egress controlled by guards or appropriately trained and cleared personnel.

(c) Access limited only to personnel whose duties require access and who have been authorized in writing by the commanding officer. Controlled access of individuals (military, civil service, contractors, and visitors) conducting official business or rendering a service (vendors, delivery people) is required. All visitors must be authorized by the commanding officer and will be escorted by an authorized/cleared individual

at all times. The security interest will be protected from compromise.

(d) A personal identification and automated access control system with the capability of recording ingress and egress is required. The system must be safeguarded against tampering. An access list and entry/departure log is required for all personnel at all times.

(e) Secured during non-working hours. When secured, an operational IDS (point and area sensors), or security personnel must control access to the area.

(f) When secured, checked twice per 12-hour shift if adequately equipped with operational IDS (point and area sensors). Security force personnel will check for signs of attempted or successful unauthorized entry, and for activity that could compromise the security of the restricted area.

4. Administration and Logistics. Recommendations concerning the contents of this order may be forwarded to PMO "Physical Security" via the appropriate chain of command.

5. Command and Signal

- a. Command. This order is applicable to MCRD/ERR, PI.
- b. Signal. This order is effective the date signed.

R. L. GRABOWSKI

DEPOT ORDER 5530.3 Ch 1

From: Commanding General
To: Distribution List

Subj: RESTRICTED AREA DESIGNATION/AREAS IN WHICH DEADLY FORCE
IS AUTHORIZED FOR MARINE CORPS RECRUIT DEPOT/EASTERN
RECRUITING REGION, PARRIS ISLAND (MCRD/ERR, PI)

Encl: (1) New page inserts to DepO 5530.3

1. Situation. To transmit new page inserts to the basic order.
2. Mission. As an annual requirement, the Commanding General must authorize the Restricted Area Designation/Areas in which deadly force is authorized.
3. Execution. Remove enclosure (1) of the basic order and replace with corresponding pages in the enclosure.
4. Summary of Change. None.
5. Filing Instructions. File this change transmittal immediately behind the signature page of the basic order.

M. R. BOWERSOX
Chief of Staff

DISTRIBUTION: A

DISTRIBUTION STATEMENT A: Approved for public release;
distribution is unlimited.

MCRD PARRIS ISLAND RESTRICTED AREAS

1. The following areas have been designated as Level I restricted areas.

Asset	Building, Room	Responsible Unit	Comments
GME	Compound	H&SBN	Deadly Force NOT Authorized
EOC	#144, Secure room	H&SBN	Deadly Force NOT Authorized
Disbursing	#10	H&SBN	Deadly Force NOT Authorized
Military Police Dispatch Area	#455, rm 110	PMO	Deadly Force NOT Authorized
Depot Commissary	#704, Cash room	DECA	Deadly Force NOT Authorized
Depot Veterinary Clinic Scheduled Drug Storage Area	#517A	Atlantic District Veterinary Command	Deadly Force NOT Authorized

2. The following areas have been designated as Level II restricted areas.

Asset	Building, Room	Responsible Unit	Comments
Ammunition Supply Point	Explosive Storage Bunkers A-1, A-2, A-3, A-4, A-5, A-6, A-7, A-9	H&SBN	AA&E, Inherently Dangerous to Others Deadly Force IS Authorized
Depot Armory	#601	H&SBN	AA&E, Inherently Dangerous to Others Deadly Force IS Authorized
MCRD Museum Functional Weapons storage area (Weapons Cold Room)	#111, Weapons Cold Room located on third floor.	H&SBN	AA&E, Inherently Dangerous to Others Deadly Force IS Authorized
PMO Ready for Issue Room (RFI)	#455, rm 118	PMO	AA&E, Inherently Dangerous to Others Deadly Force IS Authorized
MCK Weapons Storage Room	#409	MCCS	AA&E, Inherently Dangerous to Others Deadly Force IS Authorized
Depot Fuel Farm	#552, Day Tanks	H&SBN	Deadly Force NOT Authorized
G-6 Data Storage	#159, rms 110, 116	H&SBN	Deadly Force NOT Authorized
Depot Telephone	#1050	H&SBN	Deadly Force NOT Authorized
Micro Sever Farm	#295, Vault	H&SBN	Deadly Force NOT Authorized
E911 Switch	#864	H&SBN	Deadly Force NOT Authorized

3. The following areas have been designated as Level III restricted areas.

Asset	Building, Room	Responsible Unit	Comments
None.
