PRESCRIBED FIRE

Did you know fire can be good for people and the land? After many years of fire exclusion, an ecosystem that needs periodic fire becomes unhealthy. Trees can be stressed due to overcrowding; fire-dependent species disappear; and flammable fuels build up can become hazardous.

What is a Prescribed Fire?

Prescribed fire is a **planned fire**; sometimes called a “controlled burn” or “prescribed burn,” and used to meet management objectives. A prescription is a set of conditions that considers the safety of the public and fire staff, weather, and probability of meeting burn objectives. *Environmental Division staff are Certified Prescribed Fire Managers for MCRD Parris Island.*

What are the Benefits of Prescribed Fire?

- Assists with Recruit Training Area Management
- Minimizes the Spread of Pest Insects and Disease
- Removes Unwanted Species that Threaten Species Native to An Ecosystem
- Stimulates Growth of New Forage for Wildlife
- Improves Habitat For Threatened and Endangered Species
- Recycles Nutrients Back Into the Soil
- Promotes Growth of Trees, Wildflowers, and other Plants
- Reduces Hazardous Fuels; Uncontrolled Wildfires

Prescribed Fire Protocol on MCRD Parris Island:

- Examine Weather Conditions
- Burn Areas Determined Based on Recruit Training Schedule
- Approval from G4 and Stakeholders
- All Hands Message Distribution
