Used Oil Must Be Recycled. It's the Law!

Thousands of do-it-yourselfers (DIYers) change their own oil on cars, trucks, motorcycles, boats, recreation vehicles, and lawnmowers. If you are one of them, you need to know that used oil must be recycled. It's the Law!

www.scdhec.gov/environment/recycling-waste-reduction/used-motor-oil-recycling

Used motor oil can contain hazardous substances such as heavy metals which can pose potential risks to the environment. If illegally and improperly disposed of – dumped on the ground, septic tanks, or storm drains – used oil can contaminate Parris Island's rivers, marshes, and groundwater.

Where Can I Recycle Used Motor Oil?

At the Parris Island Recycle Center
Bldg. 958 Vieques Road (Horse Island)
Hours of Operation: Mon – Fri 0800 - 1500
